

2017 Hyundai E&C Technology Grand Award

The Department congratulates Ashan Senel Asmone (PhD student) and Lau Shing Hou (Final year, PFM) who won the silver award at the “2017 Hyundai E&C Technology Grand Award”. The title of their proposal is “Designing in Reality: Automated Maintainability Assessment for Building Projects using BIM”. This project was guided by Ashan’s supervisor; Professor Michael Chew.

This year has been the 10th anniversary of the competition where more than 130 works were submitted internationally. The award ceremony was held in Seoul, South Korea on 21st September 2017. This award included an invitation for Ashan and Shing Hou to visit the award ceremony in Seoul and visit the state-of-the-art Hyundai E&C research and development center and their cutting edge technological marvels installed in current projects.
